## SHORT DESCRIPTION

TextHelp provides **online tools** that helps build confidence at school with **reading, writing and math**.

The tools aim at making learning easier for everyone.

## MAIN FEATURES

The solutions provided include different online **tools for students and teachers**.

There are 3 main products for education:

**Read&Write:** a literacy support tool that helps with tasks like reading text out loud, understanding unfamiliar words, researching assignments and proofing written work.

**OrbitNote:** allows to transform and interact with documents in a different way, creating an accessible and collaborative space.

**Equatio:** an advanced equation editor that makes math digital and accessible. Students can speak, draw, or type problems and equations directly onto their devices. Teachers can use Equatio to create accessible math lessons and assessments.

## HELPS WITH

TextHelp products put a specific attention on students with special educational needs. The tools dealing with science, for instance, include having math read aloud, and visualizing math and science concepts digitally, which can be very useful for students with dyslexia, dysgraphia, or discalculia.

The purpose of TextHelp tools is to provide students with the tools they need to access everyday school curricula.

The tools not only help to learn, but also to actively engage with resources and peers, as well as to demonstrate/discover mastery in a specific topic area.
