A DELE-TEAM

SHORT DESCRIPTION

This software enables French speakers to use **auditory reading by voice synthesis**. It can be used by anyone who needs fast, semantically-focused follow-up reading with a voice echo when writing.

MAIN FEATURES

- **Continuous vocalization** of text, with visual tracking.
- On-the-fly **marking of important points** in the text;
- **Search functions** facilitated by vocalized localisation
- All reading and searching functions are available in writing;
- **Vocalized echo of keystrokes**;
- Text can be exported in a **variety of formats** (including direct voice files);
- **Spelling correction with dictionary enrichment** for personalisation;
- Can be used with **voice dictation**.

HELPS WITH

Reading: The program supports dyslexic people with reading by providing them with continuous vocalization of text and visual tracking.

Writing: Spelling correction with dictionary enrichment make it easier for the user to create new documents.

Editing: The program can be useful for editing long pieces of text, thanks to the search functions and options to mark important parts and changes.
